### Does My Child Have a Learning Disability?

Your child looks perfectly normal but...you suspect something is wrong. Why? Does your child have an uneven pattern of 'can do's and can't do's'?

Below are frequent comments describing common characteristics of individuals who may be at risk for being identified as having a learning disability.

Such difficulties may include one or more of the following areas:

- Understanding, remembering or producing language
- Reasoning
- Motor co-ordination
- Mathematics
- Noticing and remembering social information
- Emotional maturation
- Processing information
- Organization

**Warning signs are just that...warnings. They don't necessarily mean there are problems but they should be discussed.**
